Programme

Module 1: Designing the Supply Chain

- Fundamentals of supply chain management
- Supply chain structures
- Supply chain strategy
- Supply chain dynamics
- Evaluation of strategy, design, dynamics, and structure

Case Study:

- Analysis of supply chain dynamics

Practical Exercise:

- Evaluate supply chain designs

Module 2: Planning and Executing Supply Chain Operations

- Demand forecasting
- Planning for the supply of goods and services
- Inventory management
- Operations planning and management

Case Study:

- Analysis of the impact of forecasting techniques on operations planning

Practical Exercise:

- Plan and control a company's inventory

Module 3: Improving Overall Supply Chain Performance

- Aligning the supply chain with the company's overall strategy
- Managing associated risks
- Measuring, analyzing, and improving performance
- Implementing sustainable and socially responsible practices

Case Study:

- Evaluation of a company's risk management strategy

Practical Exercise:

- Develop a balanced scorecard to measure overall performance

Module 4: Using Technology in the Supply Chain

- The different technologies involved
- Business processes and their interaction with technology
- The importance and management of data
- The impact of emerging technologies

Case Study:

- Analysis of the impact of implementing a new technology

Practical Exercise:

- Select an appropriate technology for a given scenario

Module 5: Preparing for the CSCP Exam

- In-depth review of key concepts covered in all modules
- Resources for preparing for the APICS CSCP 2025 Certified Supply Chain Professional exam
- Strategies and tips to maximize exam success
